Articles and book chapters:
Statement from candidate for new regional representative for the region North Macedonia
Professor Petar Todorov

I would like to nominate myself for the position of a regional representative for the region North Macedonia. Our section was accepted by ESEH decision just before the COVID19 pandemic which had negative effects on implementation of the activities proposed in by the previous regional representative, Aleksandar Shopov. We would like to continue our work. The potential for studying environmental history underlined in the candidacy letter is vast. This year, as editor of Glasnik, the oldest historical journal published in Macedonian language, I will include at least one article dealing with environmental history. I intend to turn this into a practice for the future issues.

For the upcoming period I propose the following activities for our region:

- Prepare a monthly digest in Macedonian of news related to environmental history;
- Organize a workshop that will introduce environmental history to historians in the region;
- Establish an online journal in Macedonian that will publish articles and other materials related to the environmental history of the region.
