

CURRICULUM VITAE

Saláta, Dénes

WORK & EDUCATION

- 2012- Research fellow, Institute of Environmental and Landscape Management, Faculty of Agricultural and Environmental Sciences, Szent István University, Gödöllő, Hungary
- 2009-2012 PhD course in Environmental Sciences, Department of Nature Conservation and Landscape Ecology, Phd. School of Environmental Sciences, Szent István University, Gödöllő, Hungary
- 2003-2009 MSc in Agricultural Environmental Management Engineering, Szent István University, Faculty of Agricultural and Environmental Sciences, Institute of Environmental and Landscape Management, Gödöllő, Hungary
- 1999-2003 A-level, Izsó Miklós Secondary School (specialised on nature conservation, Edelény, Hungary)

SPECIALISATION

Landscape and land-use history, traditional land use, traditional forest utilisation and management, wood pastures and grazed forests (area: Carpathian Basin, mainly Hungary)

LANGUAGES

Mother tongue: *Hungarian*

Medium level (reading, writing, speaking): *English*

TEACHING EXPERIENCE (2009-)

Lectures (2009-: BSc, MSc):

Habitat protection and ecosystem regulation

Land use traditions in the Carpathian-basin – Management on floodplains

Protection of cultural heritage

Agriculture – The culture of land

Knowledge on Carpathian-basin

Seminars, Practical courses (2009-: BSc, MSc levels):

Knowledge of nature at winter field-practice

Geology and soil science

Research methodology

On-field research methodology

OTHER WORKING ACTIVITIES

Supervision (2009-): BSc, MSc theses writing; supervision for (university) student country competitions in Agricultural sciences.

Scientific organisation experience (2009-): field trips/works/surveys, workshops/conferences on a regular basis (as part of PhD scholarships and job/position).

STATEMENT OF CANDIDACY

Candidate name: Saláta, Dénes
Position: Country Representative
ESEH supervisor: Kiss, Andrea

As the country representative of Hungarian ESEH Group I intend to continue the work of previous country representatives. I consider the importance of inner cohesion of the Hungarian Group and the wider opening to the international scientific public.

In my opinion the continuation of the ongoing practice as annual meetings and mini-conferences or permanent information – at least via e-mails – of the Group is essential and necessary to maintain the evolved good relations within. I would like to provide the possibilities and encourage the scientific and professional cooperation among the group members with organising annual meetings, and in case of a positive response with occasional concerted activities e.g. workshops or field trips. My aim is also to (moderately) increase the number of Hungarian members with individuals who committed for the wider subject and the ESEH.

I think wider opening to both the domestic and the international scientific public is of vital importance. I would like to promote the work and activities of the ESEH at Hungarian conferences and workshops with related topics to environmental history – as the previous RR have done. Moreover, I would like to assist and encourage the members to participate in the international ESEH events and other Hungarian and international scientific conferences, workshops and summer schools.
